

# TASKAHOLIC

**"Taskaholic"** is a free product management site. Choose what your co-workers and clients can see, or create a custom group to manage permissions. Each application can be separately managed allowing you to track each and every user role, and get tasks done. Gather valuable information on all of your managed projects directly from the dashboard! The ability to see things that are due, all conveniently placed within the user dashboard. You may view the progress on anything you hold to be important.
